MISSION No. **14**

Date: **11 JAN. 44**

TO: **OSCHERSLEBEN, GER.**

HEADQUARTERS
401ST BOMBARDMENT GROUP (H)
OFFICE OF THE OPERATIONS OFFICER

B-C-1

12 January 1944

SUBJECT: Leader's Narrative, Mission No 14, 11 January 1944.

TO : Commanding Officer, 401st Bombardment Group (H).

1. The 401st Lead Box lead the 94th Combat Wing on the mission of 11 January 1944. The high box was a composite box, consisting of two squadrons from the 401st and one squadron from the 351st. The 351st furnished a complete low box. The Group assembly was made by using individual assembly according to Wing SOP. Group and Wing assembly was greatly aided by the weather ship. The Wing assembly was made as briefed, except that it was 2,000 feet less than briefed at point C due to weather. Division assembly was normal. The only interference came from a group of B-24's which were flying 180° in the opposite direction along the Division assembly line. The 94th Wing fell into second place at the proper interval. The 94th followed the 41st into the target. The course was approximately fifteen to twenty miles south of the briefed course. At the IP the lead wing made an S to come back on course. The 1st Wing - in third position - fell into second place on this S. The 94th Wing also made an S and fell into third position. Bombing was by groups. The lead box bombed approximately 30° off the briefed course. The low box was forced out on the S turn and bombed a town Northwest of the primary. The high box bombed the primary after the lead box. Bombing results were good. At present, the bombing results of the high box are ~~not~~ unknown. The high box carried incendiaries and the lead and low boxes carried 500 lb GPs. Rally with the high box was normal on the turn from the target. The low box, after bombing a target of opportunity, joined another Wing on the return from the target. The 94th Wing continued on the briefed course home in third position in the Division. Slight variations in course to avoid flak areas were made enroute home. The diversion and let down messages were received on W/T, authenticated and complied with. The information was given to the high and low box leaders and they proceeded to carry out let down instructions as individual groups. The lead box let down and proceeded as squadrons. The lead squadron landed at Wendling just as the field closed in. The lead box leader called the high box leader on VHF and diverted him to other fields east of Wendling. High box ships and low and high squadron ships of the lead box landed at various fields along the coast.

2. Flak was encountered in several places, but was avoided at all places except over the target. Here it was meager but accurate. Enemy fighter attacks were heavy for two hours, during which time friendly fighter escort was not present. Three types of twin engine fighters - ME 110's, ME 109's and JU 88's - and two types of single engine fighters -

ME 109's and FW 190's - were used in the attacks. A large percentage of tail attacks were made, and rockets were used. It is believed that one ship in the high box was hit with a rocket, exploded and may have knocked down two wing men. The 401st lost four ships and the 351st reports the loss of six. None were reported lost to flak, and all are presumed to be lost as a result of fighter attack.

ALLISON C BROOME,
Major, Air Corps,
Operations Officer.

HEADQUARTERS

B- -1

401st BOMBARDMENT GROUP (H)
OFFICE OF THE OPERATIONS OFFICER

12 January 1944

SUBJECT: High Box Leader's Narrative, Mission No 14, 11 January 1944.

TO : Commanding Officer, 401st Bombardment Group (H).

1. The Composite Box was first to takeoff. It was composed of thirteen airplanes of the 401st Group. Assembly was by individual aircraft at 9,000 feet. The composite box assembled in position above the lead box before departure from Deenethorpe. We left Deenethorpe slightly early but made our points good along the route. Very good use was made of the weather ship until well past the coast. We joined the Division formation and followed the 41st Wing. The route was approximately thirty miles south of course. Formation was close and good after altitude was reached until the target where we uncovered for bombing. The high box was third for bombing. The 94th Wing was forced to "3" between the IP and the target which spread the groups out considerably. The high box bombed on a heading of 20°. The bomb run was made under heavy attack by fighters and flak but was a good run. The high box had trouble catching the lead box until well past the target, but that was unavoidable due to numerous flak positions on the route out. The high box received the diversion message to land at Wondling. By the time we reached the coast, however, the weather was too bad to continue and we landed at Matlask. One airplane was damaged in landing, but the crew was uninjured. Friendly fighters, P-47's, were picked up for a short distance on the way in. We were attacked by enemy fighters soon after the P-47's left us, and the attacks continued for approximately two hours. Enemy ships attacking included ME 109's, ME 110's, FW 190's, ME 210's and JU 88's. Attacks were vicious and were carried out to within 200 to 300 yards. Enemy fighters were seen firing rockets, and several towing aerial bombs on long cables. Flak was medium for our group, and was very accurate both in altitude and deflection. Flak was avoided except at the target.

2. Nineteen airplanes assembled and none turned back. Three ships were lost at the target out of the high squadron and it is believed sixteen airplanes bombed the target.

EDWIN W BROWN,
Major, Air Corps,
High Box Leader.

HEADQUARTERS
401ST BOMBARDMENT GROUP (H)
OFFICE OF THE OPERATIONS OFFICER

E-C-1

12 January 1944.

SUBJECT: Operational Narrative, Mission No 14, 11 January 1944.

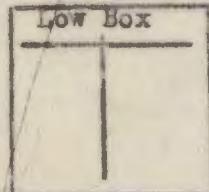

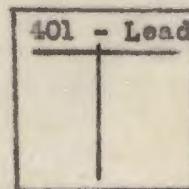

TO : Commanding Officer, 401st Bombardment Group (H).

1. The Lead Box was second to take off. It was composed of twenty one ships. The Group assembly was made according to the Wing SOP. It was individual assembly at 7,000 feet. With the use of flares and the weather ship, assembly was normal as briefed. The High and Low Boxes assembled 2,000 feet above and below the Lead Box. Wing assembly was normal; VHF was used extensively due to weather conditions and proved an invaluable aid. The advice from the weather ship was extremely useful. Division assembly was made as briefed, and the only interference came from a group of B-24's which passed directly along the Division assembly line in the opposite direction. The Wing departed the coast one minute early and two miles south of course. The route in was south of course. The 94th Wing followed the 41st Division leader to the target and this route was approximately twenty miles south of course. At the target, the lead Wing made an S to get back on course and the 1st Wing, in the third position, fell into second position. This caused the 94th Wing to also make an S, which it completed in time to come into third position. The Wing separated into Groups for the bomb run. The lead box bombed on a run approximately 30° off the briefed course, but was due to the fact the 'S'ing by the wings ahead forced the 94th lead box to do likewise. The formation was good during the bomb run. The actual straight run was about 90 seconds. The route back was as briefed, except minor turns to avoid flak areas. Three to four wings were always in view during the return. A let-down to 18,000 feet was made over Holland near the coast to avoid instrument conditions. A let-down over the water near the coast was made according to Division orders received by W/T. Landing was made at Wendling as ordered, though only six ships - the lead Squadron - landed there before the field closed in. The other ships landed at other fields along the coast. Fighter escort occurred for only a short time going in. Enemy fighter attacks occurred for two hours to the target and on the route out. They were heavy and determined. No unusual circumstances, other than weather and bomb run mentioned above, occurred. Flak was meager but accurate over the target. It was seen in several other places, but all flak areas were avoided on the course in and out. Chaff seemed to be effective again, as fire was often seen several thousand feet away from the vicinity of any formations. Enemy fighters were present in large numbers during the two hours the Wing had no friendly fighter support. Ships seen were ME 109's, FW 190's, ME 210's, ME 110's and JU 88's. Attacks were determined and aggressive.

except PFF /

2. Twenty one (21) aircraft including the PFF ship took off. All were present in assembly. One turned back before leaving the coast - No 42-38033. Two turned back after being dispatched Nos 42-39837 and 42-40050. Eighteen (18) ships including one (1) PFF were dispatched. One was shot down before reaching the target. Seventeen (17) ships (incl. PFF) bombed the target. The three that turned back did not make a sortie and were not over the target. They are listed above.

- a. Formation at takeoff and on cruise (diagram attached.)
- b. Formation over the target (diagram attached.)
- c. The 401st Group flew the lead box of the 94th Combat Wing:

3. One ship, No 42-39969, was shot down by fighter attack before reaching the target. Time and position are not known by Leader. During the bombing run, the lead formation covered approximately 1,200 feet in width and 900 feet in length. This is borne out by the bomb pattern. The primary target was bombed and the results were good.

ALLISON C BROOKS,
Major, Air Corps,
Operations Officer.

OFFICE OF THE OPERATIONS OFFICER

B-C-1

12 January 1944

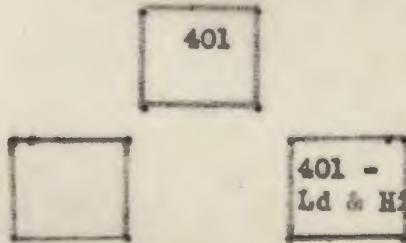

SUBJECT: Operational Narrative, Mission No 14, 11 January 1944.

TO : Commanding Officer, 401st Bombardment Group (H).

HIGH BOX NARRATIVE

1. The high box was a composite box; the 401st furnished a lead and a high squadron and the 351st furnished a low squadron. The two 401st squadrons took off and formed at briefed altitude. They formed according to Wing SOP 'Individual Assembly'. The 351st low squadron joined them during assembly. The high box came into position during Wing assembly and remained in position to the target. (See lead box narrative for departure and route in.) The high box fell in trail to bomb and bombed behind the lead box. Results are not yet known, as they have not yet returned to base. Rally was normal, and the return home was with the Wing. Over the North Sea, the high box broke off and let down according to SOP. They did not land at Wendling, but landed at several different fields along the coast. Wendling closed in as the high box crossed the coast. (See lead box narrative for fighter and flak information).

2. No aircraft from the 401st Group returned early from the high box.
- Formation at takeoff and on cruise (diagram attached).
 - Formation over the target (diagram attached).
 - The 401st flew the high and lead squadrons of the high box:

3. Three aircraft, Nos 42-31083, 42-39893 and 42-37809 were shot down before reaching the target. One was hit by a rocket and exploded. Its time and position are not known as high box Navigator has not yet

returned to base. The high box formation was good over the target. Incendiaries were dropped but photos are not in yet and results are unknown.

HEADQUARTERS
401ST BOMBARDMENT GROUP (H)
Office of the Air Statistical Officer

14 January 1944

SUBJECT: Group Bombardier's Narrative.

TO : Commanding Officer, 401st Bombardment Group (H).

1. The Group Bombardier has nothing to offer over and above what has been submitted by the two Lead Bombardiers. In event of any additional pertinent information a supplementary report shall be submitted.

For the Operations Officer:

KEN W. DAUBLE,
Capt., Air Corps,
Air Statistical Officer.

HEADQUARTERS
AAF STATION 128
APO 634 U.S. ARMY

12 January 1945

SUBJECT: Lead Bombardier's Narrative, 401st Group Box,
Mission No. 14, OSCHERSLEBEN, GERMANY

TO : Commanding Officer, 401st Bombardment Group (H)
APO 634, U.S. Army

1. Almost all of the route into enemy territory was obscured by cloud cover, but at the time the Navigator reported that the Group was 20 minutes from the IP, a large opening in the clouds could be seen ahead and to the left, so it was fairly certain that visual bombing could be done. At the first opening in the clouds which was crossed, orientation was made on the map and it was found that the group was on the south side of the Hartz mountains. The lead wing turned and uncovered near Hersberg, and the 401st followed suit, heading toward the target. We were already at Wernigerode, well beyond Goslar (the intended IP) so the 401st turned slightly to the right and toward the target. Bomb doors were opened here.

2. The snow covered ground made the wooded sections exceptionally distinct, and by this means it was easy to locate the area where the target was known to be. The lead wing had swung to the left, heading toward the secondary target, but at this point they made a right turn and headed toward Oschersleben. Since it looked as if the 401st was on a collision course with them we made a 60° left turn and later a 90° right turn back to the target in order to come in behind them. About 60 seconds from our release point their bombs began exploding and covered the target with smoke, making it very difficult to identify the buildings in the target area. The 401st finally chose as the aiming point, a building beyond and to the right of the large hanger.

3. After "Bombs Away" the group made a 30° left turn and proceeded North to keep from going into the flak area at Magdeburg. During the turn the hits were observed, and it was seen that most of our bombs were hitting over, with about 1/3 of them striking in the building area.

4. Little flak was noticed but it was accurate. The air was rather rough due to prop wash from the preceding wing.

ARNOLD C. KUENNING
Capt, AG

HEADQUARTERS
AAF STATION 128
APO 634 U. S. ARMY

13 January 1944

SUBJECT: Lead Bombardier's Narrative, High Composite Box,
Mission No. 14, Oscherslaben, Germany

TO : Commanding Officer, 401st Bombardment Group (H)
APO 634, U. S. Army.

1. The formation approached the IP a little south of course, and after taking proper interval, was south east of briefed IP. As we were able to pin-point very well it was easy to pick up the target. To keep in trail with the Lead Box, it was necessary to "S". Hearing the target, the Group turned on a course of 20° Mag. and started the run. Drift was 20° right, dropping angle .39.

2. On the run in, two bombs fell away from the Lead ship due to an undetermined malfunction. Some Bombardiers dropped on these and fell approximately two miles short. The majority of the bombs, which were dropped on the lead bombardier's synchronization, hit the target. Results were excellent.

3. The left Bomb Bay racks failed to release electrically, so the bombs were salvoed. Otherwise all equipment functioned normally.

DUNWARD W. PESMIRE,
1st Lt., A C
Lead Bombardier

13 January 1944

SUBJECT: Mission Summary Report. (Mission of 11 January 1944)
TO : Group Operations, Station 128.

1. Abortives.

a. Airplane No. 42-38033 returned early because of an oxygen leak in Co-Pilot's compartment.

b. Airplane No. 42-39837 failed to complete mission for the reason that No. 3 Engine failed in flight.

c. Airplane No. 42-40080 returned early because Cylinder Head Temperatures were too high. Ground Check revealed no malfunction.

2. Battle Damage.

a. 42-31081 - Two flak holes through left elevator. Flak hole through tip of left horizontal stabilizer. Flak hole in under side of right horizontal stabilizer, near leading edge. Flak hole through right wing, inner panel, near trailing edge. Flak hole through right aileron. Flak hole in leading edge of left wing, outer panel.

b. 42-39932 - Flak hole in bottom of right wing, outboard of No. 4 Engine, near leading edge. Cal. .30 hole in bottom of left wing, outer panel. Flak hole in top of left wing, left of No. 1 Nacelle. Flak hole in Plexiglas Nose Section. No. 2 and No. 4 props damaged by flak.

c. 42-31072 - Small flak hole in bottom of left wing, outer panel. Small flak hole through top of right wing, outer panel. Small flak hole in leading edge of right wing, outer panel, de-icer boot damaged.

d. 42-31488 - Small flak hole in left side of fuselage, beneath Pilot's window. Small flak hole in left side of fuselage, beneath Navigator's window. Flak hole in Navigator's window. Astro-Dome broken by flak. Very small hole in No. 4 ignition shield.

SUBJECT: Mission Summary Report. (Continued)

e. 42-39847 - Flak hole through trim tab of left wing. Flak hole in bottom of left wing, to left of No. 1 Nacelle, Tokyo tank damaged. Small flak hole in bottom of left wing tip. 3" crack in Plexiglas in Upper Turret.

Station No. 128
A.P.O. No. 634
14 January, 1944

SUBJECT: Supplementary Mission Summary Report

TO : Group Operations, Station 128, APO 634.

1. The following battle damage was sustained on the mission of 11 January, 1944 and not previously reported for the reason that A/C was away from home station.

a. 42-31116 - 6" X 7" rip in left aileron, two ribs damaged; 20mm hole through left wing, outer panel; 3" X 4" flak hole in top of left wing, outer panel, front spar damaged; 2" X 2" flak hole through right wing, inner panel, near trailing edge; 20mm exploded in tail section of fuselage, causing numerous small holes; Right landing light broken by flak.

b. 42-31069 - Large dent in # 3 ring cowl caused by spent shell casing; Flak hole in right side of vertical stabilizer;

c. 42-31485 - Flak hole through left wing tip; Three flak holes in left wing, inner panel; Flak hole in top of right wing, outer panel; Two flak holes in bottom of right wing, inner panel; Flak hole in leading edge of left wing, left of landing light; Flak hole in left side of fuselage, beneath horizontal stabilizer; Flak hole through vertical stabilizer, near center.

d. 42-37833 - Three cal. .30 holes in leading edge of left wing, between # 2 engine and fuselage; Flak hole through left wing, outer panel; Three flak holes in bottom of left wing, outer panel; Two flak holes in bottom of right wing, near fuselage; Flak hole in top pf left wing, inner panel; Flak hole in top of right wing, outer panel.

e. 42-31193 - Two flak holes through left wing, outer panel; Two flak holes in top of right wing, near tip; Three flak holes in top of right wing, inner panel; Flak hole in left side of fuselage, beneath trailing edge of wing.

SUBJECT: Supplementary Mission Summary Report. (continued)

f. 42-37843 - Flak hole in top of left wing, left of # 1 nacelle; Flak hole in leading edge of right wing, just outboard of # 4 engine; Flak hole in bottom of right wing, outer panel; Flak hole in left side of fuselage, near station 6D.

g. 42-40057 - Flak hole in top of right wing, near fuselage; Flak hole in bottom of left aileron; Flak hole in ring wing tip.

h. 42-31511 - Flak hole in leading edge of right wing, near station 24; Flak hole in bottom of left wing between # 2 engine and fuselage, just back of leading edge; damaging air duct.

i. 42-31087 - Flak hole through right wing tip, near station 37; 20mm hole in leading edge of right wing, near station 36, through top causing large hole; Flak hole top of left wing, near station 21; Flak hole in right aileron between station 19 $\frac{1}{2}$ and 20 causing damage to elevator.

j. 42-31034 - Hole in left side of fuselage, near station 6a, out on right side near station 6b; Flak hole in right bottom side of fuselage, near station 6j; Flak hole through left elevator, causing damage to elevator; Flak hole in vertical fin, center, near station 3; Flak hole in right wing, bottom side, near station 24, causing damage to tokyo tank; Flak hole in right wing, bottom side, near station 3; Flak hole in right wing, top side, near station 26; Small flak hole in left wing, top side, near station 21.

k. 42-39943 - Flak hole in leading edge of # 4 ring cowling, left side, near center; Flak hole in leading edge of vertical fin, near station 9, causing damage to stiffeners and de-icer boot; Flak hole in fuselage, left side, near station 6d, causing internal damage to stiffener; Hole in right side of radio room at station 5h, through plate at station 6, over ball turret, and out of left side at station 16; Flak hole in vertical fin, left side, near station 9; Flak hole in vertical fin, left side, near station 4; Flak hole in left wing, top side, near station 24; Flak hole in right wing, top side, near station 18; Small flak hole in left wing, top side, near station 37; Flak hole through top of left wing, out bottom, 1 ft. forward of trailing edge, near station 8, causing damage to landing flap; Small flak hole in left life raft door; Flak hole in air intake left wing, near station 2, causing damage to 1st angle brace in chord of wing and 1st 45 degree brace of wing.

SUBJECT: Supplementary Mission Summary Report. (continued)

1. 42-31036 - 4" X 5" flak hole in right side of fuselage, # 3 bulkhead damaged; Small flak hole in leading edge of right wing, de-icer boot damaged.

2. 42-31081 - Numerous small holes in left side of fuselage between stations 4 and 5, caused by explosion of 20mm shell; 20mm hole through left wing, outer panel, cutting stringer and stiffener; Small flak hole in top of left wing, outer panel; Two small flak holes in leading edge of left wing.

3. 42-31072 - Small flak hole through left wing, outer panel, fuel tank damaged; 3" rip in fabric on left side of rudder; Tail light lens broken by flak; Flak hole in leading edge of left wing, outer panel; Flak hole in # 4 oil cooler fairing, fuel line damaged.

OFFICE OF THE INTELLIGENCE OFFICER
STATION 126 - APO 634
U. S. ARMY

15 January 1944.

SUBJECT: Supplemental Enemy Opposition, Mission, 11 January 1944.

TO : Headquarters, 1st Bombardment Division, APO 634. (Attn: A-2).

1. This report is a supplement to prior report which was based on interrogations from eight crews. This report is based on the remainder of crews interrogated later.
2. Tactics employed by E/A generally remain as indicated in first report. However, a few additions can be made to these.
3. Attacks from tail in vicinity from 4:30 to 8:00 o'clock were low, level, above and high. Attacks from 3 and 9 o'clock were low, level, above and high. Nose attacks, 11 to 1 o'clock primarily, were low, level, above and high. A few attacks from all angles are reported. The majority of all attacks were from level to high and crews estimate up to 90% in vicinity of tail.
4. E/A attacking, all types, were pressing attacks from all angles to within 100 yds. When E/A broke away from attack they mostly rolled or split, out and down or under our A/C. Few would pass over or bank to side of our A/C, giving our gunners good shots.
5. E/A colorings information has been supplemented. Yellow-nose A/C, type unidentified, were observed passing through our formations. Black ME-210's, black JU-88's and black FW-190's were observed to have grayish to white bellies with some employing a wavy pattern, particularly ME-210's and JU-88's.
6. Crews report many 8/2 and 7/2 E/A carrying rockets which were fired frequently at our formations from astern and with fair accuracy. One TG and STG on same crew stated a ME-109F had extremely large one under belly and fired at very close range, with extremely large flash, of 200-300 yds. just as it pulled up and banked. Could this have been due to close range?
7. Several crew members corroborate report of towed bomb on cable and describe size of bomb as that of large oxygen bottle hanging on cable approximately 200 yds. long. Stated type of E/A carrying same was ME-110.
8. ME-210's or ME-410's (?) reported by crews making high attacks from 12 o'clock and make turns above and away, while in turn the E/A fired the remote controlled side guns. These type A/C also would sit out of .50 cal. range and "lob shells" at our formations. Effectiveness of this firing was not stressed by crews.

9. Crews again report 20mm shells from E/A seem to burst at a set range. Further stated they saw many FW-190's (estimate 100-150) carrying belly tanks. Some report seeing belly tanks dropped near or at our formation.

10. One crew flying with H group, high squadron, reported seeing E/A drop bombs on low element of own group formation and on group following. Unable to check to-date with this crew to ascertain if bombs were fused to explode at formations altitude. Will phone this information when available.

11. Eighty-four (84) combat claims have been submitted by this Group. Several from wounded personnel have not been submitted yet.

12. Crews comments seem to indicate the E/A would definitely make co-ordinated formation attacks at times, but this seem to evolve accidentally when different E/A would find themselves close to each other. Primarily most attacks left impression of "mad-scrabble" individual efforts. Crews also express opinions that T/E pilots were not as good as S/E pilots. S/E and T/E fighters also were queued up together. Some crewmen also express belief E/A concentrated attacks more on high squadron than others.

W. B. FRY,
Major, AC,
Group S-2 Officer.

OFFICE OF THE INTELLIGENCE OFFICER
STATION 128 - APO 634
U. S. ARMY

15 January, 1944.

SUBJECT: Comments of Crews participating in Osschersleben Mission,
11 January, 1944.

TO : COMMANDING OFFICER, 401st Bombardment Group (H), Station
128. (THRU: Lt. Col. H. E. Rogner and Major A. C. Brooks).

1. A/C 1843, Lt. Pordyn would like to see the P-51 pilot at target have a citation, Lt. Black reported A-2 bomb release being cut, side windows in tail froze and Sgt. Hertzman could not see out of them.

2. A/C 1077, Lt. Nicklawsky believed the formation was too fast, Lt. Manning reported that windows were not cleaned, Lt. Keller found an incendiary bullet in tail gun ammunition.

3. A/C 9993, Entire crew "Gunners should never point guns at other friendly ships".

4. A/C 9847, Lt. Wilson asks "why were bomb bay doors opened so early - just before IP".

5. A/C 1072, Lt. Shotts says that three crews to a truck going out to the plane, Lt. Briarton "lower station of inside rack, left hand bomb bay was not cocked and bombs jammed also four fuses came out in my hand when I tried to pull pins".

6. A/C 9932, All crew members praised the reception given them at Cottishall, Lt. Duquette says that the preparation used to clean the plexi glass only smears the windows.

7. A/C 1116, Capt. Peck is unhappy that group became separated so far apart.

8. A/C 0001, #3 engine feathered from IP on, drew fighters.

9. A/C 1090, All ships should park at 45 deg. when running engines, is recommended by Lt. Piper, all crew members - "treatment and reception at Cottishall was excellent", all gunners "551st was using tracers - why can't we?"

W. B. PRY,
Major, A. C.,
Group S-2 Officer.

OFFICE OF THE INTELLIGENCE OFFICER
STATION 128 - APO 634
U. S. ARMY

D-II-5

12 January 1944.

SUBJECT: Enemy Opposition, Mission 11 January 1944.

TO : Headquarters, 1st Bombardment Division, APO 634, U. S. Army.
(Attention: A-2 Section).

1. This report is based on six (6) interrogation and teletype reports from several of our A/C which landed away.
2. The attacks by E/A commenced in vicinity of the German border going into the target and were pressed in huge number to the target and back out until leaving the enemy coast. 150 to 250 E/A reported attacking our formations. Types of E/A attacking reported as JU-88s, JU-87s, ME-109s, ME-110s, ME-210s, FW-190s and one crew reports seeing HE-111s. The enemy tactics employed were most varied although the majority of attacks were from 4:30 to 7 o'clock from level to high. T/E fighters were attacking line astern and also with 4 to 5 line abreast, and pressing attacks extremely close up to 200 yards. These T/E A/C did not use evasive action of S/E and would pull upward to side of our A/C. The S/E E/A were pressing attacks in number but were breaking away at greater ranges than T/E A/C in most cases. Some attacks with S/E and T/E working together were reported at 5 to 6 o'clock. Several attacks from 3 and from 9 o'clock low to level reported and numerous nose attacks predominately from 11 to 1 o'clock reported from level to high with S/E A/C mostly attacking nose. One of our A/C reports 38 individual attacks with 30 of them from 5 to 8 o'clock and 8 on nose. Another reports 40 individual attacks.
3. Numerous Enemy fighters employed use of releasing smoke when making passes. Numerous rockets from fighters reported but ineffective on our A/C.
4. Unusual enemy tactics reported with ME-109 chasing JU-88s as if attacking across front of our formation. When in front of our formation the ME-109 would turn in sharply making nose attack.
5. Enemy A/C coloring most varied with grey FW-190s, black and white ME-109s, 110s with white tails, solid black ME-210s, two A/C pure white, and several with red and white stripes reported.

W. B. PRY,
Major, A. C.,
Group 2-2 Officer.

OFFICE OF THE INTELLIGENCE OFFICER
STATION 128 - APO 634
U. S. ARMY

D-K-1

12 January 1944.

SUBJECT: Unusual Enemy Tactics.

TO : Headquarters, 1st Bombardment Division, APO 634.
(Attention: A-2).

1. One new and unusual enemy tactic and one old one were observed of an Me 109 chasing a Ju 88 in front of formation. The Ju 88 simulated going down smoking and the Me 109 would pull ahead and then attack our ships by swinging around and come in at our right side of formation.

W. B. FRY,
Major, A.C.,
Group S-2 Officer.

401st GROUP

DATE 12 Jun 1944

F L A K R E P O R T

1. Route followed: 5247 - 0156 E - then deviated slightly south of course to 5136 - 1059 E - to 5157 - 1049 E to 5158 - 1056 E to target to 5248 - 0155 E to English Coast to base.
 2. Visibility at Target. (Any condensation trails?) CAVU - No con trails observed.
 3. No. of A/C over Target: 25 - ~~8 known~~ - ~~22 unknown~~
 4. Formation over target, with height of each A/C. Those A/C damaged by Flak to be circled, and if seriously damaged, insert small "S". If any A/C shot down by Flak, say so:-
- OVER
- 4.a. What evasive action was taken? Slight - mild "S" turns
 5. General Axis of attack. (From lead A/C if possible). 29 deg. Mag.
 6. How long did formation fly straight and level before bombing? 78 seconds
 7. Turn after bombing. Left turn - with heading 0 deg. Mag.
 8. Position of group in relation to other Groups: Lead Group in 94th Wg.
And High Group (composite of 401st & 551st)
 9. A short description of Flak en route (if any), and at the Target, including if possible a suggestion as to type of fire - central emplaced - i.e., continuous following, predicted concentrations, predicted barrages, or fixed barrages.
- ATTACHED: See memo
10. Any other Comments, Phenomena, etc. At target area 3 orange bursts of continuously pointed fire were seen. Just before IP, 4 or 5 ground rockets came up with white streamers following smoke after explosion. Red flak was also seen in this area, and target area, together with some blue bursts from ground rockets were observed. One crew reports rockets from E/A/

Memo to Flak Report

9. At 1107 hours, 5232-0720E, 20,000 ft., meagre, inaccurate flak was encountered. It was good for height but poor for deflection. Bursts were black and from continuously pointed fire. At 1152 hours, 19,600 ft., over target, moderate and accurate flak was also encountered from 24 guns. One crew mentions 8 guns N.W. - 16 S. and 18 E. of target not reported in briefing. At 1217 hours, vicinity of Munden, 20,000 ft., meagre, inaccurate flak but good for height, black bursts and continuously pointed was noted. At 1219 hours, vicinity of Hanover, 20,000 ft., flak was observed off to left. It was black and continuously pointed. At 1340 hours, 5240-0437E, 16,000 ft., meagre, inaccurate black bursts of flak were noticed off to left of our formation.

STATION WEATHER OFFICE
AAF STATION 128
APO 634

12 January, 1944

Weather Interrogation Summary for Operations on 11 January, 1944.

TAKE OFF:

4/10 strato-cumulus, base 4,000', tops 4,500'. 6-8/10 altocumulus, bases 8,000', tops 10,000'. Visibility 1 mile. Sfc wind 160 Deg 8 mph.

ROUTE OUT:

10/10 undercast, tops 10,000', from well in English Isles to near target.

TARGET:

2/10 to clear strato-cumulus. Visibility 4-6 miles.

RETURN ROUTE:

Similar to route out.

BASES ON RETURN:

10/10 strato-cumulus, base 800'. Visibility 1,000yds with continuous sleet and drizzle.

REMARKS:

Landed near Norwich (1512). 10/10 strato-cumulus, 3,000'. Vis 2 miles.

071096/3
050073/3 LEAD
PFF GY 4775 010036/2

The production of FW 190's has been reduced from 250 a month to 155 by the successful attack on Marienburg, Anklam, & Hammestein by our forces & by the destruction of Hassel Betschhausen by the R.A.F. Of the remaining 155 a/c, 70 or more than 45% are produced by the Ago plant at this target. In addition to final assembly, this plant also manufactures nearly all the major components necessary for its assembly, wings - fuselages - tail assemblies - and thus becomes the most valuable single target left in the FW 190 combine.

This plant was attacked by our forces in July and a fair degree of damage was done - production was lowered to 55 planes a month but by now all damage has been repaired & the plant is again in full production.

The area of this target is a closely-knit group of fourteen buildings forming a compact quadrangle roughly 2100 feet square at the western end of the airfield. The primary objectives should be the component shops where the parts such as wings & fuselages are assembled & produced. Bldg. # 8 studied in detail by the Bomber in the MPI and is used for the assembly of major components as well as containing a forge & foundry.

In the one story bldgs. of this quadrangle are the a/c recently assembled or plane ready for testing. Part of these bldgs. are camouflaged with netting.

A successful attack on this target will prevent the manufacture of FW 190 airframe components for three months. Some final assembly might be resumed within a month provided components could be furnished from other plants - but with facilities for FW production strained as they are this loss will be severe. In addition 50 to 70 planes would be destroyed in the hangar & assembly shops if ~~the attack was~~ ^{you attack are} successful

The factory is located one mile east of the centre of the T. City & stands on an extensive area of low lying ground. Factory stands on west side of Air Field.

SECONDARY - Large Assembly plant of M.F. 110's & possibly other twin engine types.

No Convoy - No smoke screen is reported
Escape - PW

~~Chocolate~~
~~Remove~~ Identifying material

Do not speak of this target

FLAK INFORMATION

PRIMARY TARGET:

No heavy guns listed.

Wind from 320 degrees from 40 M.P.H. ---phoned in by Lt. Rempe

Stay just "outh of landfall to avoid small heavy flak area. (Egmond). On route in to target keep North of ZWOLLE as briefed, which is also reported as a small heavy flak point.

Make sharp left turn of 317 degrees Mag. after Bombs away to avoid heavy gun concentration around Magdeburg. In other words, don't overshoot the target!

On route out of the target, again follow the briefed course, avoiding flak at Secondary target(Braunschweig) by keeping to the right of it, unless it has to be attacked. At Celle (5215-1049E) it is desirable to skirt to the North of this town which is also fortified by heavy guns and which will allow you not to come near the very heavily dfended area of Hanover. Other areas to avoid are Nienburg and Diepholz (light) and Bawinkel (light) on the course back to E/ coast.

No convoys are expected.

No smoke screens reported at target.

SECONDARY TARGET:

49 guns within range.

Wind from 270 degrees from 40 M.P.H.

Axis of attack avoids southwestern area, which is heavily protected.

phoned in by Lt. Rempe.

OVER

TIDES:

<u>HIGH</u>	<u>LOW</u>

Station No. 128
A.P.O. No. 634
14 January, 1944

SUBJECT: Supplementary Mission Summary Report

TO : Group Operations, Station 128, APO 634.

1. The following battle damage was sustained on the mission of 11 January, 1944 and not previously reported for the reason that A/C was away from home station.

a. 42-31116 - 6" X 7" rip in left aileron, two ribs damaged; 20mm hole through left wing, outer panel; 3" X 4" flak hole in top of left wing, outer panel, front spar damaged; 2" X 2" flak hole through right wing, inner panel, near trailing edge; 20mm exploded in tail section of fuselage, causing numerous small holes; Right landing light broken by flak.

b. 42-31069 - Large dent in #3 ring cowl caused by spent shell casing; Flak hole in right side of vertical stabilizer;

c. 42-31485 - Flak hole through left wing tip; Three flak holes in left wing, inner panel; Flak hole in top of right wing, outer panel; Two flak holes in bottom of right wing, inner panel; Flak hole in leading edge of left wing, left of landing light; Flak hole in left side of fuselage, beneath horizontal stabilizer; Flak hole through vertical stabilizer, near center.

d. 42-37833 - Three cal. .50 holes in leading edge of left wing, between # 2 engine and fuselage; Flak hole through left wing, outer panel; Three flak holes in bottom of left wing, outer panel; Two flak holes in bottom of right wing, near fuselage; Flak hole in top pf left wing, inner panel; Flak hole in top of right wing, outer panel.

e. 42-31193 - Two flak holes through left wing, outer panel; Two flak holes in top of right wing, near tip; Three flak holes in top of right wing, inner panel; Flak hole in left side of fuselage, beneath trailing edge of wing.

SUBJECT: Supplementary Mission Summary Report. (continued)

i. 42-37843 - Flak hole in top of left wing, left of # 1 nacelle; Flak hole in leading edge of right wing, just outboard of # 4 engine; Flak hole in bottom of right wing, outer panel; Flak hole in left side of fuselage, near station 6D.

j. 42-40057 - Flak hole in top of right wing, near fuselage; Flak hole in bottom of left aileron; Flak hole in ring wing tip.

k. 42-31511 - Flak hole in leading edge of right wing, near station 24; Flak hole in bottom of left wing between # 2 engine and fuselage, just back of leading edge; damaging air duct.

l. 42-31087 - Flak hole through right wing tip, near station 37; 20mm hole in leading edge of right wing, near station 36, through top causing large hole; Flak hole top of left wing, near station 21; Flak hole in right aileron between station 19 $\frac{1}{2}$ and 20 causing damage to elevator.

m. 42-31034 - Hole in left side of fuselage, near station 6a, out on right side near station 6b; Flak hole in right bottom side of fuselage, near station 6j; Flak hole through left elevator, causing damage to elevator; Flak hole in vertical fin, center, near station 3; Flak hole in right wing, bottom side, near station 24, causing damage to Tokyo tank; Flak hole in right wing, bottom side, near station 3; Flak hole in right wing, top side, near station 26; Small flak hole in left wing, top side, near station 21.

n. 42-39943 - Flak hole in leading edge of # 4 ring cowling, 18ft side, near center; Flak hole in leading edge of vertical fin, near station 9, causing damage to stiffeners and de-icer boot; Flak hole in fuselage, left side, near station 6d, causing internal damage to stiffener; Hole in right side of radio room at station 6h, through plate at station 6, over ball turret, and out of left side at station 16; Flak hole in vertical fin, left side, near station 9; Flak hole in vertical fin, left side, near station 4; Flak hole in left wing, top side, near station 24; Flak hole in right wing, top side, near station 18; Small flak hole in left wing, top side, near station 37; Flak hole through top of left wing, out bottom, 1 ft. forward of trailing edge, near station 8, causing damage to landing flap; Small flak hole in left life raft door; Flak hole in air intake left wing, near station 2, causing damage to 1st angle brace in chord of wing and 1st 45 degree brace of wing.

SUBJECT: Supplementary Mission Summary Report. (continued)

1. 42-31036 - 4" X 5" flak hole in right side of fuselage, # 3 bulkhead damaged; Small flak hole in leading edge of right wing, de-icer boot damaged.

2. 42-31081 - Numerous small holes in left side of fuselage between stations 4 and 5, caused by explosion of 20mm shell; 20mm hole through left wing, outer panel, cutting stringer and stiffener; Small flak hole in top of left wing, outer panel; Two small flak holes in leading edge of left wing.

3. 42-31072 - Small flak hole through left wing, outer panel, fuel tank damaged; 3" rip in fabric on left side of rudder; Tail light lens broken by flak; Flak hole in leading edge of left wing, outer panel; Flak hole in # 4 oil cooler fairing, fuel line damaged.

Station 128

A.P.O. 634
13 January 1944

SUBJECT: Mission Summary Report. (Mission of 11 January 1944)

TO : Group Operations, Station 128.

1. Abortives.

a. Airplane No. 42-38033 returned early because of an oxygen leak in Co-Pilot's compartment.

b. Airplane No. 42-39837 failed to complete mission for the reason that No. 3 Engine failed in flight.

c. Airplane No. 42-40050 returned early because Cylinder Head Temperatures were too high. Ground Check revealed no malfunction.

2. Battle Damage.

a. 42-31081 - Two flak holes through left elevator. Flak hole through tip of left horizontal stabilizer. Flak hole in under side of right horizontal stabilizer, near leading edge. Flak hole through right wing, inner panel, near trailing edge. Flak hole through right aileron. Flak hole in leading edge of left wing, outer panel.

b. 42-39932 - Flak hole in bottom of right wing, outboard of No. 4 Engine, near leading edge. Cal. .30 hole in bottom of left wing, outer panel. Flak hole in top of left wing, left of No. 1 Nacelle. Flak hole in Plexiglas Nose Section. No. 2 and No. 4 props damaged by flak.

c. 42-31072 - Small flak hole in bottom of left wing, outer panel. Small flak hole through top of right wing, outer panel. Small flak hole in leading edge of right wing, outer panel, de-icer boot damaged.

d. 42-31488 - Small flak hole in left side of fuselage, beneath Pilot's window. Small flak hole in left side of fuselage, beneath Navigator's window. Flak hole in Navigator's window. Astro-Dome broken by flak. Very small hole in No. 4 ignition shield.

SUBJECT: Mission Summary Report. (Continued)

e. 42-39847 - Flak hole through trim tab of left wing. Flak hole in bottom of left wing, to left of No. 1 Nacelle, Tokyo tank damaged. Small flak hole in bottom of left wing tip. 3^o crack in Plexiglas in Upper Turret.
