MISSION No. **23**

Date: **11 FEB. 44**

TO: **FRANKFURT, GER.**

HEADQUARTERS
401ST BOMBARDMENT GROUP (H)
OFFICE OF THE OPERATIONS OFFICER

11 February 1944

SUBJECT: Low Box Narrative, 401st Group formation, Mission No 23.

TO : Commanding Officer, 401st Bombardment Group (H).

1. The 401st Group provided a full low group plus two squadrons to the high composite box.
2. Takeoff for the 401st low box was accomplished without incident. Individual assembly at 9,000 feet over the Deenethorpe Bunker was quickly made and the three groups of the Wing departed Point X on time. By the time the Wing reached the Division assembly line, a good tight wing formation had been formed.
3. the 94th Combat Bomb Wing assumed its proper position in the Division and crossed out approximately four (4) minutes early from Point Z. The first part of the trip in to the IP proceeded as briefed. However, prior to reaching the IP, the Wing Leader slowed up to allow the Wing on his right to proceed in ahead of him, and difficulty was experienced in holding group formation due to over-running.
4. At the IP the VHF code word for PFF bombing was given. The low group had fallen slightly behind the other two groups of the wing at the IP. However, large holes in the cloud coverage allowed the target to be seen. By using a combination of the lead group's PFF flares and visual corrections to course, the group's Lead Bombardier was able to accurately plant his bomb pattern in the center of the target area. The results were observed to be excellent.
5. Flak was encountered at the target area, but was moderate and inaccurate.
6. Fighter support throughout the mission excellent and although enemy fighters were present, very few dive attacks were allowed to develop.
7. The wing formation back from the target was very good. Wing dispersal was made at splasher 7. The low group let down through a hole in the clouds as a group and proceeded to the base for a normal formation landing.
8. All ships returned to base safely.

DONALD G. McCREE,
Captain, Air Corps,
Low Group Leader.

OFFICE OF THE OPERATIONS OFFICER

E- -1

11 February 1944

SUBJECT: High Box Leader's Narrative, Mission No 23, 401st Group Formation, 11 February 1944.

TO : Commanding Officer, 401st Bombardment Group (H).

1. The 401st Group furnished the lead and high squadrons for the high composite box for the mission of 11 February 1944. Assembly was individual on X Bunker at 13,000 feet. the 401st ships assembled without any apparent difficulty but the 351st low squadron of the composite box had only two ships as the high box left X Bunker for Wing assembly. The high composite box was one minute late at Point A, cut across the right turn at Point B and pulled into Wing formation between Points 'B' and 'C'. The Wing held assembly altitude until leaving Point C instead of starting to climb on leaving X Bunker. Wing arrived at Péing Z four minutes early and the high box was forced to fall back to allow the high box of another wing to pass. On leaving Point Z the 94th Wing was abreast of but on the wrong side of the wing on which it was to guide. The 94th Wing dropped back, crossed over to the left side and pulled abreast of this wing shortly after crossing the enemy coast. The high composite box was in prop wash several times from the right wing from the enemy coast to the IP.

2. PFF was the bombing choice announced at the IP. A right turn was made into the target. The secondary target was bombed. Straight course was held for several minutes after bombing to avoid heavy flak on the right. The 94th Combat Wing was fourth over the target. Flak over the target was moderate but accurate. Haze partially obscured the target but some observations were made and results were good.

3. When out of the flak area a right turn was made. Milk flak was encountered on leaving the enemy coast but all large concentrations were avoided. Proceeded to wing dispersal, letting down from enemy coast to dispersal point. The low squadron of the composite box left the formation at the Wing dispersal. Lead and high squadrons let down through a hole in the overcast, the lead squadron returning to base in formation, the high squadron returning individually.

4. Aircraft over the target -18 (401^{1/3} A/C -5 of other groups)

Lead Squadron	7
High Squadron	5
Low Squadron	6

5. All aircraft returned to base.

WILLIAM C GARLAND,
Captain, Air Corps,
High Box Leader.

HEADQUARTERS
401ST BOMBARDMENT GROUP (H)
OFFICE OF THE OPERATIONS OFFICER

B-C-1

11 February 1944

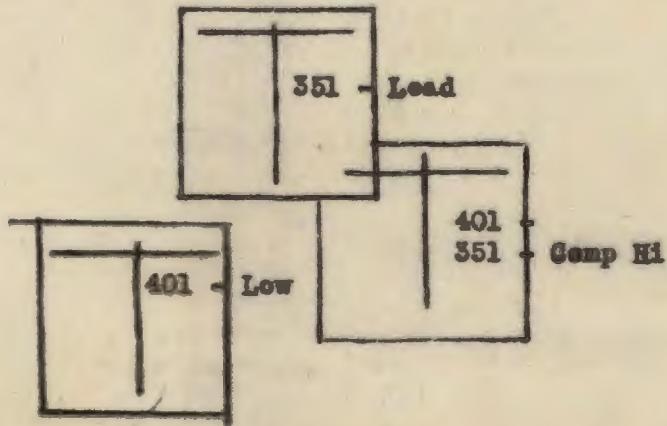

SUBJECT: Operational Narrative (Low Box) Mission No 23
11 February 1944.

TO : Commanding Officer, 401st Bombardment Group (H).

1. GENERAL NARRATIVE: The 401st Group furnished the low box for the mission of 11 february 1944. Takeoff and assembly were as briefed, though the low box did not get into proper formation in the Wing until the time of Division assembly. The route in and out was as briefed.

2. AIRCRAFT NOT ATTACKING: Twenty two(22) ships in the low box took off, however, one aircraft after being airborne flew with the composite high box. Two (2) aborted from the low box, No 42-31054 due to 100% mechanical failure and 42-31098 due to pilot error in not being able to find the formation. Twenty one aircraft considered airborne in the low box.

- a. Formation at takeoff and on cruise (diagram attached).
- b. Formation over the target (diagram attached).
- c. The 401st box was low in the 94th Wing formation:

3. AIRCRAFT LOST: No enemy aircraft were encountered. Flak was moderate and accurate. No ships were lost and all returned to base.

4. RESULTS: Bombing was PFF on the secondary. Hits were observed in the center of the target area, but no pictures were taken.

ALLISON C BROOKS,
Lt Col, Air Corps,
Operations Officer.

401ST BOMBARDMENT GROUP (H)
OFFICE OF THE OPERATIONS OFFICER

11 February 1944

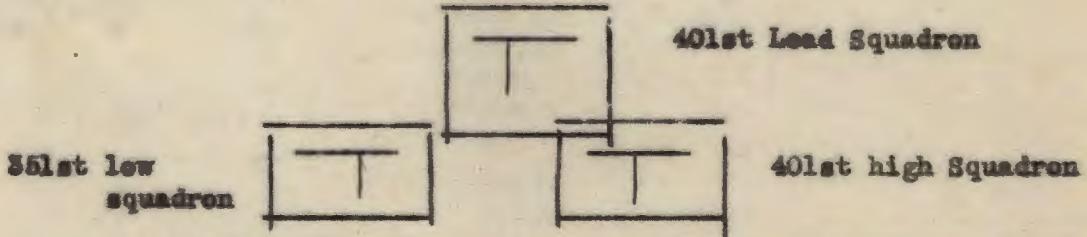

SUBJECT: Operational Narrative (High Composite Box), Mission No 23,
11 February 1944.

TO : Commanding Officer, 401st Bombardment Group (H).

1. GENERAL NARRATIVE: The 401st Group furnished the lead and high squadrons of the high composite box. Take-off and assembly were as briefed. The 351st low squadron joined the formation as briefed and the route in and out with the Wing formation was as briefed.

2. AIRCRAFT NOT ATTACKING: Fourteen (14) ships took off for the composite high box formation, one aircraft from the low box joining it immediately after take-off. (15 aircraft considered airborne with composite box) Two returned early. Ship no. 42-31077 could not find the formation - pilot error. Ship no. 42-38026 was shot by 50 caliber from another B-17. No pilot error on this ship. An investigation is being made to find the gunner who fired the shots in question.

- A. Formation at take-off and cruise (See attached diagram)
- B. Formation over target (See attached diagram)
- C. 401st furnished lead and high squadrons in 351st-401st high composite box:

3. AIRCRAFT LOST: No ships were lost, and all returned to base. Flak was moderate and accurate and no enemy aircraft were encountered.

4. RESULTS: Bombing was PFF on the secondary and hits were not observed.

ALLISON C. BROOKS,
Lt. Col., Air Corps,
Operations Officer.

11 February 1944.

SUBJECT: Group Bombardier's Narrative, Mission No. 23, Frankfurt, Germany.

TO : Commanding Officer, 401st Bombardment Group (E)

1. Twenty-two of our A/C took off for the 401st Low Box Formation loaded with 264 X 500 M43 Gp. bombs. One A/C after being airborne flew with the High Composite Box. Two A/C aborted for various reasons returning their bombs. Three of our A/C due to weather became separated from the 401st Group and joined the 303rd Group. One of the A/C of the three mentioned above jettisoned 3 X 500 M43 Gp. bombs eleven minutes before target, in order to lighten load so as to stay in formation. These three A/C dropped 53 X 500 M43 Gp. bombs on Secondary Target. Fifteen of the A/C in the Low Box dropped 192 X 500 M43 Gp. bombs on Secondary Target. One A/C having had bomb-bay doors so badly damaged by flak that they would not open completely, dropped 12 X 500 M43 Gp. bombs from target to coast by releasing bombs individually with a screw-driver. This was necessitated by the fact that the A/C was low on gasoline and A/C was losing formation.

2. Fourteen 401st A/C took off for the Composite High Box carrying 568 X 100 Lb. M47A-1 IBs. Two of these A/C aborted returning bombs to base. The twelve remaining A/C dropped 504 X 100 Lb. M47A-1 IBs on Secondary Target. One A/C from Low Group joined Composite High Box and dropped 12 X 500 M43 Gp. bombs on Secondary Target.

3. Bombs were dropped on PFF flares, however, in case of the Low Group corrections were made by visual bombing.

JULIUS PICKOFF
Captain Air Corps
Group Bombardier.

HEADQUARTERS
AAF STATION 128
APO 634 U. S. ARMY

11 February 1944

SUBJECT: Lead Bombardier's Narrative, 401st Group
Mission No. 23, Frankfurt, Germany

TO : Commanding Officer, 401st Bombardment Group (H)
APO 634, U. S. Army

1. Cloud coverage to the IP was from 8-10/10ths. The turn was made about 10 miles short of the briefed IP. When the turn was made the lead group's position was too far right, as it was flying on the right of the 401st Low Box. This meant looking into the sun to joggle; actually it was extremely difficult to see the group. Hence, when the wing ahead dropped two smoke bombs at the release point, this point was used as the approximate release line for the low group. Two seconds after passing smoke bombs, the lead Bombardier released bombs. The two second allowance was made because when previous wings dropped at that point bombs were observed to fall short of the city.

2. Bombs were away at 1224 on a Magnetic heading of 136 degrees. Hits were observed in the city.

JULIUS PICKOFF
Capt, A C

SUBJECT: Lead Bombardier's Narrative, 401-351st Composite Group
Mission No 23, Frankfurt Germany

TO : Commanding Officer, 401st Bombardment Group (H)
APO 634, U. S. Army

1. Bombing Approach and Run:

At the IP a gradual turn to the right was made. The Group was to bomb on the PFF ship in the lead group (351st). Bombs were toggled on the lead ships parachute flares.

An opening in the clouds over the target made it possible to observe hits in the central parts of the city.

2. Flak was moderate but fairly accurate.

A.P.O. 634
11 February, 1944

SUBJECT: Mission Summary Report

TO : Group Operations, Station 128, APO 634.

1. Abortives.

a. Airplane No. 42-31034 returned early for the reason that Pilot was unable to get more than 15 inches manifold pressure on # 1 engine without propeller running away. Subsequent ground check and engine run-up revealed no malfunction. It is believed that supercharger controls were not operated enough to keep warm oil circulating thru the regulator.

b. Airplane No. 42-31098 returned early for the reason that it could not locate formation.

c. Airplane No. 42-38026 failed to complete mission for the reason that it was hit by fire from friendly aircraft near enemy occupied coast. No. 4 engine cut out, and Pilot was unable to feather propeller due to loss of oil. Rudder and Rudder Trim Tab Control Cables were severed, as was all wiring to the aft of Station 6H. The Ball Turret oxygen system was also destroyed.

d. Airplane No. 42-31077 returned early for the reason that it could not locate formation.

2. Battle Damage.

a. 42-31069 - 2" flak hole in left side of fuselage, near station 3; Small flak hole in bottom of right wing, between # 3 and # 4 nacelles; Small flak hole in left side of fuselage, near tail.

b. 42-31091 - Small flak hole through left elevator; Small flak hole in bottom of left horizontal stabilizer.

c. 42-97487 - Hole in bottom of right flap, near station 16, caused by flak.

d. 42-31496 - Hole in left side of Chin Turret, caused by Flak.

e. 42-38033 - Small flak cut in top of left wing, near station 37.

SUBJECT: Mission Summary Report (continued)

f. 42-39993 - Flak hole through bottom of left wing, near station 28, causing damage to stiffener.

g. 42-39837 - Flak hole through bottom of left aileron, near station 9; Hole in left side of fuselage, near bulkhead 10, caused by flak; Flak hole through right side of vertical fin, near station 11; Hole in fuselage, behind top of chin turret caused by flak.

h. 42-31488 - 2" flak hole in bottom of left wing, outer panel, near leading edge; 2" flak hole in bottom of left wing, near fuselage; 2" flak hole in bottom of # 4 ring cowl; Large flak hole in left side of fuselage, beneath Navigator's window; Large flak hole in left side of plexiglas nose section.

i. 42-39847 - 2" flak hole through right wing, outer panel, near leading edge; 2" flak hole in left side of fuselage, near station 7.

j. 42-38002 - Small flak hole in Navigator's window on right side of fuselage; 4"X2" flak hole in bottom of left wing, near fuselage.

k. 42-39820 - Three small flak holes near leading edge of left wing, outboard of # 1 engine; 2" flak hole in bottom of fuselage, just forward of Bomb Bay.

l. 42-97440 - Large flak hole in left side of plexiglass nose section; Small flak hole in left side of vertical stabilizer.

m. 42-39932 - Flak hole through leading edge of right wing, near tip.

n. 42-31930 - Small flak holes through right wing tip, slight internal damage.

o. 42-31557 - Two small flak holes in leading edge of right wing.

p. 42-31730 - Large flak hole through left horizontal stabilizer and elevator, stabilizer and elevator change necessary; Small flak hole in top of right wing, behind # 3 nacelle, at trailing edge; Small flak hole in bottom of right wing, behind # 4 nacelle, at trailing edge.

q. 42-39873 - Small flak hole in top of fuselage, near nose section.

r. 42-39881 - 2" flak hole in leading edge of right wing, to right of # 4 engine; Small flak hole in right side of Plexiglas Nose Section.

s. 42-31863 - 2" flak hole through left wing, inner

SUBJECT: Mission Summary Report (continued)

panel, near trailing edge; Small flak hole in left side of upper turret; 2" flak hole in right side of fuselage, near nose; Large flak hole in top of fuselage, near tail.

t. 42-39847 - 2" flak hole through right wing, outer panel, tokio tank punctured; 2" flak hole through left wing, outer panel cutting stringer; Large flak hole through left side of fuselage, near station 7 and out right side and top of horizontal stabilizer, cutting stringer; Large flak hole through vertical stabilizer; 4" flak hole through bottom and out top of fuselage, at tail position; 2" flak hole in bottom of right horizontal stabilizer, rib damaged.

SUBJECT: Armament Narrative, Mission No. 23, 11 February, 1944

TO : Commanding Officer, 401st Bombardment Group (H),
APO 634, U.S. Army

1. The following Armament malfunctions were reported at the conclusion of the mission of 11 February, 1944.
 - a. One ship bomb bay doors failed to open due to freezing of retracting mechanism at altitude.
 - b. One ship's bomb bay door motor burned out.
 - c. One ship had bombs toggled from left rack, salvoed right rack. Ground check revealed no malfunction.
 - d. One ship bomb bay doors failed to open in flight, salvoed bombs. Ground check revealed no malfunctions.
 - e. One ship bombs would not toggle, dropping bombs by emergency release. This was due to maladjustment of linkage from control handle to racks.

U. S. ARMY

11 February 1

SUBJECT: Comments of Crews Participating in FRANKFURT Mission, this date.

TO : Commanding Officer, 401st Bombardment Group (H), APO 634, (Thru Lt. Col. B. E. Voorhees and Lt. Col. A. C. Brooks.)

1. A/C #8033 - Captain Fox said Lead Group did not keep air speed constant.

2. A/C #1369 - Entire crew reported they had to wait for truck 30 minutes at the Mess Hall and at the Armament shop.

3. A/C #0885 - Lt. Shanks said, "Piss-poor formation - too much S'ing."

4. A/C #1593 - Lt. Stephens says chair is needed for navigator. Lt. Sharp said larger and better condoms needed.

5. A/C #1587 - Lt. Hess reported the formation was terrible.

6. A/C #3507 - Lt Lecher said our Squadron got away from Wing and we bombed with triangle X Wing - triangle C was also in the Group we bombed with.

7. A/C #1072 - Lt. Shotts says formation was 170 MPH until 1 hour before the target when it dropped to 120-140 MPH. After stalling out he led the Squadron to another Group. Lt. Briarton said there was no sausage for breakfast. The entire crew says they needed extra ammunition.

8. A/C #1619 - Lt. Fordin said Wing leader was making frequent steep turns, kept S'ing back and forth and strung formation out. On reassembling after target, leaders didn't space formations properly - planes were too close together. Entire crew reported French toast, like pancakes, cause extreme gas on stomach causing cramps.

9. A/C #9875 - Lt. Campbell said "Leaders flew too fast" and "bomb loading hooks were left in the bomb bay."

10. A/C #7845 - Lt. Christensen reports "Piss-poor Group formation."

11. A/C #9952 - Lt. Cushman said we went in too fast and had to use emergency power. He added that the equipment room is too crowded to dress in - you have to walk all over everybody else.

12. A/C #1950 - Lt. Vokaty reported the Element Leader pulled formation over another Squadron, delaying bombs away.

15. A/C #496 - Entire crew said that so many crews were put up by the 612th Squadron there wasn't enough gloves, shoes, and cords to go around. Th added the breakfast was not good - no fruit juices for about a week. Stomach cramps bothered part of the crew.
16. A/C #9837 - Sgt. Lehr reports that the door in the camera well sticks.
15. A/C #9846 - Lt. Daves said they went in too fast and came out too slow. Indicated Air speed going in was 170 MPH and coming out it was let down to 150 MPH - this was the fault of the lead box.
16. A/C #9881 - Lt. Weber said, "High Squadron of High box dropped bombs through this element of the formation."
17. A/C #1863 - Captain Garland reports the Lead went in too fast at 165 MPH and came out too slow at 150 MPH.
18. A/C #1518 - Entire crew requests oxygen be moved.
19. A/C #1488 - Lt. Kuprie and Lt. Miller said, "Truck driver got lost," "Get them on the ball." Entire crew said, "Breakfast was too greasy," and "English rubbers are no good."
20. A/C #1830 - Captain Gould said Group leader apparently couldn't lead group - great variance in air speed from 170 to 120 MPH - not once in proper Group position in Wing. High Squadron followed as closely as possible, maintaining good Squadron formation, low Squadron proceeded to give up low Group.
21. A/C #9847 - Sgt. Harmon noticed chaff after target area, not during time over target. Lt. Kaufman reports Wing went in over target at too high air speed.
22. A/C #1069 - Lt. Wysocki said our Group lagged well behind till well over enemy territory - finally caught up. Air speed 175 MPH. Low Squadron left us and joined another Group - left High and Low Squadrons alone. Good fighter cover - best yet.
23. A/C #1091 - Sgt. Tosh and Lt. Dolan said IT-5 (#730) ball turret gunner fired at red nose P-47 at about 12 o'clock 5040 - 0727B. Sgt. Mitchell said the P/T ship flew too slow. Lt. Dempsey said Wing formation poor. He added that the breakfast was "bad."
24. A/C #9993 - Lt. Bingham said, "I guess everybody is bitching about the way the Wing was lead. Lt. Tomlinson said entirely too much time was spent at target area before run was made. Lt. Lebt said, "Pancakes and French toast don't make a very good breakfast before a mission - too heavy." Lt. Waller reports the ships ahead were throwing out chaff all the way home. The entire crew said, "the equipment situation is lousy."
25. A/C #7487 - Lt. McKinnon said, "At Briefing it was said there would be no convoys." Lt. West reports evasive action was very good. Lt. Montgomery said the streamers on bombs from lead ship helped see the bombs fall.

26. A/C #1662 - Lt. Fishbeck says "Gee" good. Lt. Chmura says formati. was even worse than normal. Lt. Smith says 120 MPH is too damn slow with bom load.

27. A/C #467 - The following report was made by Lt. W. G. Sheahan on a "Return Early" form:

"The nose escape hatch on #467 did not have a handle on the inside and the emergency release stuck. The navigator and Lt. Fowler, who was riding with us as an observer from a Pursuit Group, went out the astro-hatch and Lt. Fowler was taken to the hospital, believed with badly sprained ankle he received when he jumped to the ground from the top of the ship. The bombardier finally kicked the escape hatch in the nose open and in getting out was struck by a prop on its last turn. He was taken to the hospital but was not injured, other than being knocked down.

The ground crew's fire extinguisher was empty.

The fire fighting crew was fast and was on hand extremely quick to put out the fire in our #4 engine, which was the reason we were unable to taxi out for takeoff.

We were then assigned a 615th ship, #653, but when we got there there was no one around - and no armament man. There was no bolt stud in the ball turret guns and the waist guns and the charging arm in the chin turret guns was not connected. We also were then told we could not take off without a bombardier. Another ground spare was available near the ship we originally were to take off in, but we were not told to take it."

/S/ W.B. Fry,
/S/ W.B. PRY,
Major, A.C.,
Gp S-2 Officer.

OFFICE OF THE INTELLIGENCE OFFICER
STATION 128 - APO 634
U. S. ARMY

11 February, 1944.

SUBJECT: Enemy Tactics and Opposition.

TO : A-2, 1st Bombardment Division, APO 634, US ARMY.

1. Attacks were made near target area from 1240 to 1320 hours by six to eight FW190. These attacks were not pressed home closer than 600 to 1000 yards. Enemy aircraft dived into undercast.
2. One T/B enemy aircraft was shot down by three P47's at 1325 hours.
3. One FW190 fired rockets from six o'clock at 1000 yards and dove into clouds. Markings were one silver, two light yellow and one black FW190's.
4. No claims.

W. B. FRY,
Major, A. C.,
Group S-2 Officer.

401ST BOMBARDMENT GROUP (H)
APO 634FLAK REPORT

DATE

11 Feb. 44

TARGET: Wingert Time Bombs Away 1200

1. Route followed: 12 miles south of briefed course to Brussels then on as briefed.

2. Visibility 10/10 overcast with occasional breaks. Contrails Light - non persistent3. Position of Group in relation to other Groups: Lead
High
Low 4. Axis of Attack (Lead A/C) 142° Degrees Magnetic.2 - 250°5. Length of Straight and Level Bomb Run: 90 sec6. Evasive Action Taken: 2 S turns after bombs away7. Turn after Bombing: None

8. Number of A/C over Target

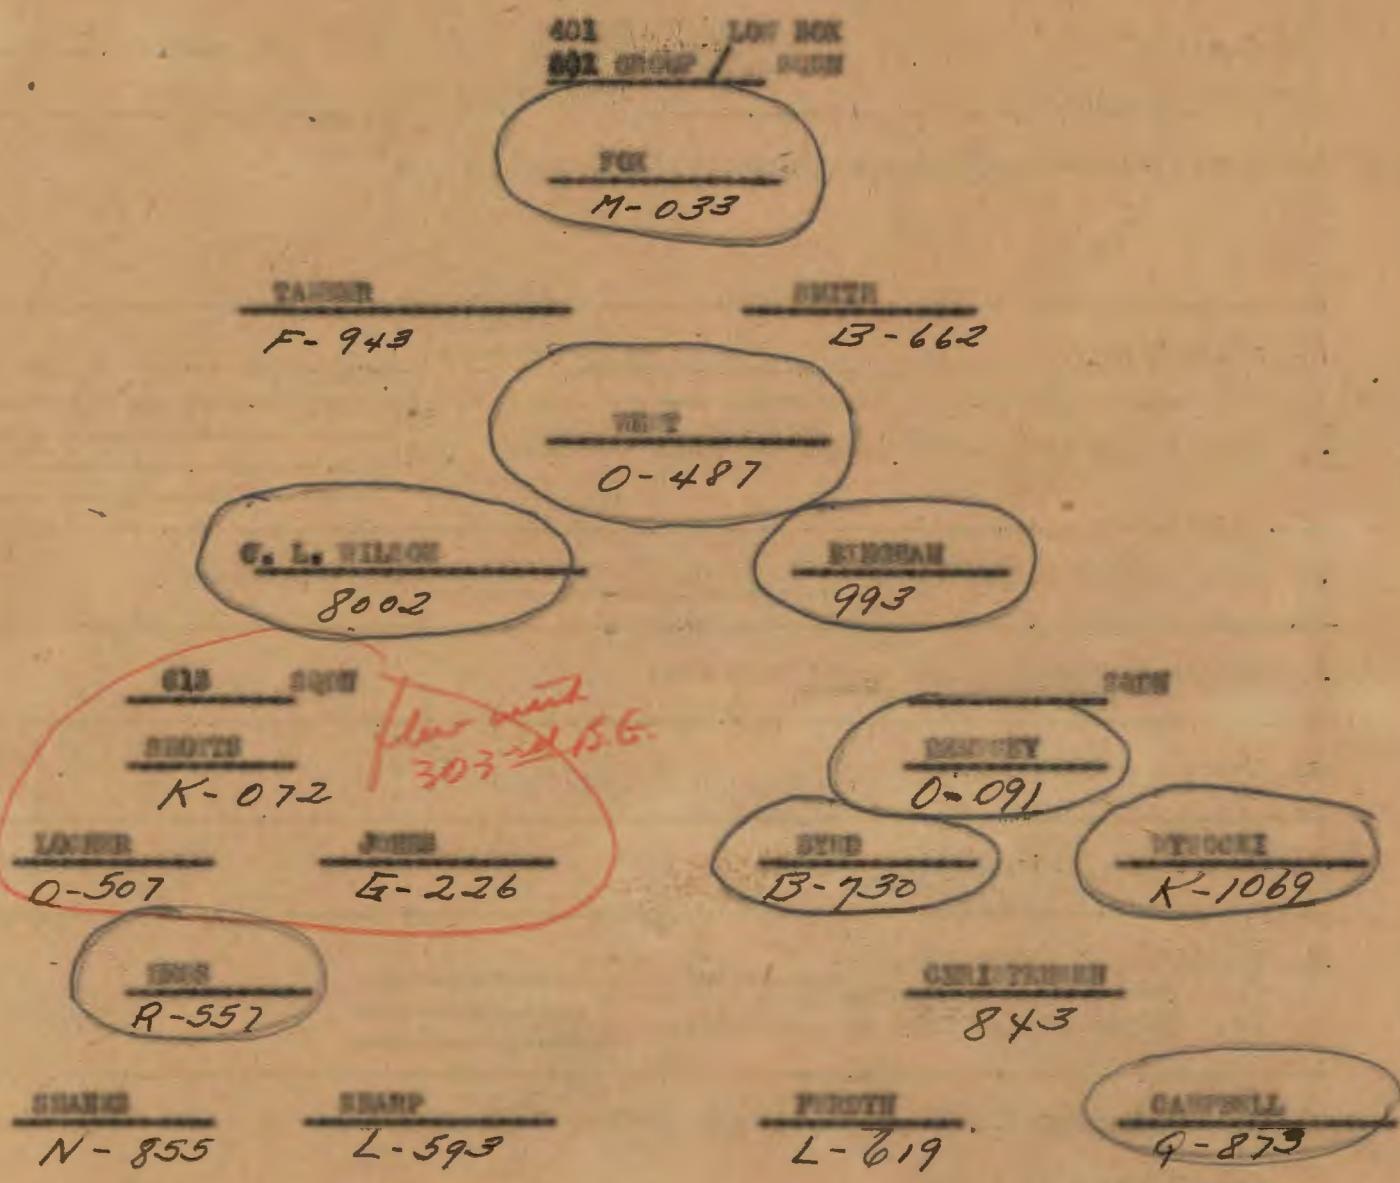

(a) Number of A/C Damaged by A/A Gunfire 52(b) Number of A/C Lost by A/A Gunfire 200

9. Description of Flak, including type of Fire Control used:

(a) Route out: None(b) Target: predicted barrage nager - fair for altitude and deflection,
black & white bursts, the white bursts were high. One ground rocket.(c) Route back: Abbeville and Amiens, nager, poor for alt. & deflection.
Black bursts.

10. Comments - Phenomena:

11. No. of A/C Carrying "Window": None
Observed Results:12. Formation over Target with height of 3 lead A/C (See Reverse Side) A/C having
battle damage to be circled; if seriously, insert "S". A/C lost to Flak to be
noted.

II. Target

- a. MPI is a metal working factory specializing in propellers and A/C component parts.
- b. Plant has been considerably expanded since 1939 and now is estimated to cover 600 acres and to employ about 10,000 people.
- c. The manufactures include sheet and strip metal of light metal used in A/C manufacture, stampings, hubs and pitch propeller parts, indercarriage legs, wheels, shock absorber parts and control gear. It also makes certain parts for submarines.
- d. It is estimated to produce 30% of Germany's propellers. It is the leading producer of such items and stoppage of its output will have a serious effect on the already hard hit G.A.B.

2. Route in on Map 1:500,000

3. Fighter support

- a. Going in
 - 1 Gp P-47's 0320E to Range limit
 - 2 Gp " 0450 " " "
 - 2 Gp " 0600 " " "
 - 3 Gp P-51's and P-38's 0740 to Range limit
- b. Coming out
 - 2 Gp P-47's 0700 to limit of range
 - 2 Gp " 0550 " " "
 - 2 Gp " 0410 " " "

4. Flak and Flak Map

a. General route in

Moderate flak at the enemy coast and intermittent fire until well inland. If the route as briefed is followed, you will skirt all the intense areas until you hit the target area.

b. Axis of attack will be 187 degrees which will pull you east of the range of most of the guns. You will then come out on a heading of 211 degrees.

This route puts you in range of 95 guns-there are 214 at the target-but the route briefed will keep you out of range of about 50% of them. You will be in the flak area about 6 minutes.

c. Chaff will be dropped by the Wings and Groups ahead of you if intense A/A is encountered.

d. Smoke screens have been reported but locations have not been fixed.

5. Nite Target Chart

a. At this time weather reports that snow can be expected on the ground.

6. Show MPI on photo 1:32,000

a. PT-if visual

b. ST-if PFF

7. Last resort Targets

Any A/D, city or industrial area positively identified as being in Germany without disrupting fighter support.

8. Special instructions.

- a. Neutral landings
- b. PW
- c. Crash landings near coast
- d. Friendly A/C
 - P-38's
 - P-47's
 - Typhoons
- e. Passport photos
- f. Empty pockets
- g. No convoys expected
- h. DON'T MENTION TARGET

HEADQUARTERS
401st BOMBARDMENT GROUP (H)
Office of the Staff Weather Officer
APO 634, U.S. Army

11 February 1944

WEATHER INTERROGATION SUMMARY FOR MISSION OF 11 FEBRUARY 1944

TAKE-OFF: 0750. 7/10 cumulus and stratocumulus, base 1500', tops 2500'. Nil middle and nil high clouds. Intermittent light rain. Visibility 3600 yards.

ROUTE OUT: 5-7/10 cumulus and stratocumulus, bases 1500', tops 2500-3000' over England. 6-8/10 altocumulus, tops 13-15,000' over the channel and continent. Nil high clouds. Visibility unrestricted above clouds.

TARGET: 1222. 6-8/10 altocumulus, tops 14-16,000'. Nil high cloud. Visibility unrestricted above clouds.

ROUTE BACK: 9-10/10 cumulus over England, base 2000', tops 6-7000'. 4-6/10 altocumulus, tops 10-12,000' over the continent and channel, becoming 4-6/10 altocumulus, base 7000', tops 9000' over England. Nil high cloud. Visibility unrestricted above clouds.

BASE ON RETURN: 1520. 6/10 cumulus, base 1500', tops 7000'. 9/10 plus altocumulus, base 7000', tops 9000'. Nil high cloud. Visibility 5 miles.

REMARKS: Intermittent light non-persistent contrails at 23-26,000'. Moderate non-persistent contrails at 26-28,000'. Temperatures a couple of degrees warmer than briefed. Winds nearly as briefed; at 22,000', 37 deg. at 84 knots over the continent; at 25,200', 38 deg. at 84 knots over France.

HEADQUARTERS
STATION NO. 128
APO 634

11 February, 1944

SUBJECT: 8-4 Combat Mission Report on Mission 11 February, 1944
TO : Commanding Officer, 1st Bombardment Division, APO 634.

1. The following Engineering failures were reported with the number of cases in parenthesis:

Rough engines due to bad spark plugs (3)
Leaking oxygen system (3)
Heaters Inoperative (2) Engine Oil leaks (2)
Generators burned out (2)
Cylinder Head Temperature Guages Out (2)

2. The following Armament failures were reported with the number of cases in parenthesis:

Frozen Bomb Bay Door Mechanism (1)
Bomb Bay Motors Burnt Out (1)
Electrical Bomb Release Mechanism inoperative due to maladjustment of linkage (1)

3. The following failures other than Engineering and Armament were reported with the number of cases in parenthesis:

None reported.

CHARLES W. HUNT
1st Lt., Air Corps,
Group Engineering Officer

HEADQUARTERS
401ST BOMBARDMENT GROUP (H)
Office of the Engineering Officer
Station 128

A.P.O. 634
11 February, 1944

SUBJECT: Mission Summary Report

TO : Group Operations, Station 128, APO 634.

1. Abortives.

a. Airplane No. 42-31034 returned early for the reason that Pilot was unable to get more than 15 inches manifold pressure on # 1 engine without propeller running away. Subsequent ground check and engine run-up revealed no malfunction. It is believed that supercharger controls were not operated enough to keep warm oil circulating thru the regulator.

b. Airplane No. 42-31098 returned early for the reason that it could not locate formation.

c. Airplane No. 42-38026 failed to complete mission for the reason that it was hit by fire from friendly aircraft near enemy occupied coast. No. 4 engine cut out, and Pilot was unable to feather propeller due to loss of oil. Rudder and Rudder Trim Tab Control Cables were severed, as was all wiring to the aft of Station 6H. The Ball Turret oxygen system was also destroyed.

d. Airplane No. 42-31077 returned early for the reason that it could not locate formation.

2. Battle Damage.

a. 42-31069 - 2" flak hole in left side of fuselage, near station 3; Small flak hole in bottom of right wing, between # 3 and # 4 nacelles; Small flak hole in left side of fuselage, near tail.

b. 42-31091 - Small flak hole through left elevator; Small flak hole in bottom of left horizontal stabilizer.

c. 42-97487 - Hole in bottom of right flap, near station 16, caused by flak.

d. 42-31496 - Hole in left side of Chin Turret, caused by Flak.

e. 42-38033 - Small flak cut in top of left wing, near station 37.

SUBJECT: Mission Summary Report (continued)

f. 42-39993 - Flak hole through bottom of left wing, near station 28, causing damage to stiffener.

g. 42-39837 - Flak hole through bottom of left aileron, near station 9; Hole in left side of fuselage, near bulkhead 10, caused by flak; Flak hole through right side of vertical fin, near station 11; Hole in fuselage, behind top of chin turret caused by flak.

h. 42-31438 - 2" flak hole in bottom of left wing, outer panel, near leading edge; 2" flak hole in bottom of left wing, near fuselage; 2" flak hole in bottom of # 4 ring cowl; Large flak hole in left side of fuselage, beneath Navigator's window; Lagge flak hole in left side of plexiglas nose section.

i. 42-39847 - 2" flak hole through right wing, outer panel, near leading edge; 2" flak hole in left side of fuselage, near station 7.

j. 42-38002 - Small flak hole in Navigator's window on right side of fuselage; 4"X2" flak hole in bottom of left wing, near fuselage.

k. 42-39820 - Three small flak holes near leading edge of left wing, outboard of # 1 engine; 2" flak hole in bottom of fuselage, just forward of Bomb Bay.

l. 42-97440 - Large flak hole in left side of plexiglass nose section; Small flak hole in left side of vertical stabilizer.

m. 42-39932 - Flak hole through leading edge of right wing, near tip.

n. 42-31930 - Small flak holes through right wing tip, slight internal damage.

o. 42-31557 - Two small flak holes in leading edge of right wing.

p. 42-31730 - Large flak hole through left horizontal stabilizer and elevator, stabilizer and elevator change necessary; Small flak hole in top of right wing, behind # 3 nacelle, at trailing edge; Small flak hole in bottom of right wing, behind # 4 nacelle, at trailing edge.

q. 42-39873 - Small flak hole in top of fuselage, near nose section.

r. 42-39881 - 2" flak hole in leading edge of right wing, to right of # 4 engine; Small flak hole in right side of Plexiglas Nose Section.

s. 42-31863 - 2" flak hole through left wing, inner

SUBJECT: Armament Narrative, Mission No. 23, 11 February, 1944

TO : Commanding Officer, 401st Bombardment Group (H),
APO 634, U.S. Army

1. The following Armament malfunctions were reported at the conclusion of the mission of 11 February, 1944.
 - a. One ship bomb bay doors failed to open due to freezing of retracting mechanism at altitude.
 - b. One ship's bomb bay door motor burned out.
 - c. One ship had bombs toggled from left rack, salvoed right rack. Ground check revealed no malfunction.
 - d. One ship bomb bay doors failed to open in flight, salvoed bombs. Ground check revealed no malfunctions.
 - e. One ship bombs would not toggle, dropping bombs by emergency release. This was due to maladjustment of linkage from control handle to racks.
